Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM

(Docket Number 07-AFC-5)

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in FLorida. We studied the proposal in class, and I personally question your rationale in approving the Ivanpah Solar Electric Generating System (ISEGS) project. The project, even with the mitigation measures described in the Decision Report, will have remaining significant impacts on the environment that outweigh the benefits.

I strongly believe that these Solar Powered Systems should not be build for the sole fact that we need to focus on our environment. These turtles need a place to live, and if people do not properly move them, the turtles will be in danger. I feel that this project can easily be built somewhere else. Please acknowledge my request for this System not to be built in sole reason of preserving the environment.

Sincerely yours,

Michael Castronuovo
