**Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM**

**(Docket Number 07-AFC-5)**

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in Florida. We studied the proposal in class, and I personally question your rationale in approving the Ivanpah Solar Electric Generating System (ISEGS) project. The project, even with the mitigation measures described in the Decision Report, will have remaining significant impacts on the environment that outweigh the benefits.

I think that this project is not well thought out and is heading straight for disaster. I think that one should not spend the absurd amount of money on such a project that requires the removal of natural residents from their home. I think that the idea of the project is good, but the blue prints are simply too much.

I wish you the best in your future endeavors yet, I just do not believe that this is a plan where it will be more of a benefit than a inconvenience. I say inconvenience because who wants to be driving through a serene vacant piece of wildlife and see off in the distance huge industrial size towers.

Regardless of how I feel you are going to do what you please, I just hope you consider more of others peoples opinion's verses the money factor.

Sincerely yours,

Nicoletta Everett
