Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM

(Docket Number 07-AFC-5)

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in Florida. We studied the proposal in class, and I personally question your rational in approving the Ivanpah Solar Electric generating System project. I fell this project is a terrible Idea because it will cause more problems than solve them in the scheme of things. With BP being a part of this project should send up red flags considering the damages to the environment they have already caused. It says that they have to have all the tortoises removed from the job sight area and relocated to another part of the desert which will most likely result in the death of many of the tortoises due to the fact they will be in a new environment, new predators, and heat stroke due to the fact they will try to return to the area they were relocated from.

Sincerely Yours,

Nick Dublino
