Re: IVANPAH SOLAR ELECTRIC GENERATING SYSTEM

(Docket Number 07-AFC-5)

To whom it may concern,

I am writing as a concerned member of a science class at Saint Leo University in Florida. We studied the proposal in class, and I personally question your rationale in approving the Ivanpah Solar Electric Generating System (ISEGS) project. First of all nature is beautiful and nothing should be done to harm it. This project that is about to take place in Mojave Desert is wrong and is going to destroy the beauty of our planet. This project should be delayed for future decision. Moving this project to another location could be an option. I don't think the company realizes the impact on our environment that is going to take place if this project occurs. Overall I believe that the project, even with the mitigation measures described in the Decision Report, will have remaining significant impacts on the environment that outweigh the benefits.

Sincerely yours,

Konstantin Pyankov
