REPORT OF CONVERSATION Page 1 of 1

**Systems Assessment and
Facilities Siting Division**

FILE: 09-AFC-03

PROJECT TITLE: Mariposa Energy Project (MEP)

<input checked="" type="checkbox"/> Telephone	916-654-3846	<input type="checkbox"/> Meeting Location: NA	
NAME:	Jacquelyn Leyva	DATE: 9/9/10	TIME: 3:55 pm
WITH:	Jacquelyn Leyva, Air Resources Engineer, Rajesh Dighe (Mountain House Community)		
SUBJECT:	AERMOD Dispersion Modeling files		

PHONE CONVERSATION: Mr. Dighe stated that he would like to run the modeling software, and was wondering if he could obtain the AERMOD software along with the modeling files. I told Mr. Dighe he had the option of review the output files in a text form, however he has concerns regarding the input parameters that were assumed by the applicants. He wanted to run the program with appropriate assumptions himself. I directed Mr. Dighe to the Lakes Environmental website so he could contact them directly regarding obtaining a license for the modeling software. His concerns are as follows:

1. Obtaining his own version of AERMOD software, but did not know where to inquire about this request.
2. He is concerned with the dispersion modeling completed by the applicants. And would like to see a more geographical or topographical representation of how the pollutants will disperse throughout his community.
3. He wants to make his own conclusion that all the inputs are accurate.
4. He has concerns due to the proximity of the project site to the near by schools.
5. He does not think the tables in the AFC well describe how the criteria pollutants will be directly affecting his community.
6. He would like to run the program and the CD files, and process his independent analysis before the PSA for Mariposa is published.
