Hello Mr. Hoffman,

I'm a resident of Mountain House, and I would like to express my concern about the possibility of an energy plant coming to Mountain House.

In this area, there are a lot of problems with people having asthma and sinus infections. The air is already extremely bad here, and it would be worse if we had a toxic energy plant here! I never had asthma before, now I have to take medicine for at least half of the year for asthma/sinus infections. Most of my family members that live in the Mountain House/Tracy area have asthma and/or sinus infections throughout the year. We did not have it before we moved to this area.

Please reconsider another area where the population is less, and where the air can be cleaner.

Thank you very much for your consideration and understanding,

Darlene and Mark Roehl
