Subject: Comments for the Preparation of the 2011 "Bioenergy Action Plan" Docket Number 10-BAP-01

Comment/Recommendation: Diversion of all organic waste contained in the States municipal waste stream, from landfill disposal.

It is well documented the negative effect organic waste contained in municipal solid waste (MSW) has on air, water, and land of the State of California. It is also well documented the energy potential of biomass contained in MSW. In no way does this recommendation encourage or suggest use of mass burn facilities, but instead calls for thorough segregation of the organic component of MSW, to be used first for production of commodity, second production of energy.

Thank you,

Larry T. Buckle, PE
