Dockets,

Please docket this transmittal email from the Desert Southwest Regional of Western Area Power Administration (Western, or WAPA). Mr. Patrick Erwin of Western has completed the attached electricity supply forms on behalf of the City of Needles. The city has reviewed these forms and provided necessary input such as retail sales data.

Needles is one of the smallest, most remote publicly owned utilities in California, and has been hard hit by the Great Recession. By agreement, Western handles most of Needles' electricity procurement including scheduling through the NV Energy balancing area (control area) to which Needles is connected. I have reviewed these forms with Mr. Erwin and judge them to be complete, accurate, and trustworthy. Thank you.
