

**MEMORANDUM OF UNDERSTANDING
BETWEEN THE
CALIFORNIA ENERGY COMMISSION
AND
BUREAU VERITAS NORTH AMERICA, INC.
FOR DESIGN REVIEW, PLAN CHECK, AND
CONSTRUCTION INSPECTION OF THE
SEGS VIII POWER PLANT PROJECT ADDITION
88-AFC-1C**

RECITALS:

- A. The SEGS VIII project was certified by the Energy Commission on March 21, 1989 and began commercial operation on December 12, 1989. NextEra Energy Operating Services, LLC (NextEra), operates the facility and is requesting approval to construct and operate additional rows of solar thermal collectors. The project site is located in unincorporated San Bernardino County, California.
- B. The Energy Commission must ensure that the project is designed, constructed, and operated in conformity with the Energy Commission's Decisions (Decisions); the California Building Standards Code (CBSC)¹; the local building codes adopted by the County of San Bernardino; and applicable laws, ordinances, regulations, and standards (LORS). The Decisions contain the conditions of certification for construction and operation of the project. Any work undertaken by the Delegate Chief Building Official (CBO) prior to the issuance of the petition approval shall be performed at the sole risk of the CBO. The Energy Commission does not guarantee the approval of the project by executing this Memorandum of Understanding (MOU).
- C. If the project is approved, the Decision will require that NextEra submit engineering plans, calculations, specifications, and other project-related information (as required by sections 105.3 and 106.1 in Appendix Chapter 1 of the CBSC) to the CBO for the project, for review and approval, prior to and during construction of the project. The intent of this requirement is to provide an independent review of the project's final design and inspections of the project's construction, to ensure compliance with applicable engineering LORS, the local building codes, the CBSC, the Facility Design, Geology, and Transmission System Engineering Conditions of Certification, the Storm Water Pollution Prevention Plan (SWPPP) and the Drainage, Erosion and Sediment Control Plan (DESCP).²

¹ The California Building Standards Code (CBSC) references the 2007 edition or the most current edition at the time of construction including, but not limited to, specific sections noted. Referenced section numbers specified may change if a more updated edition is used.

² The Facility Design, Geology, and Transmission System Engineering Conditions of Certification noted throughout this MOU are provided in the Decision. The Storm Water Pollution Prevention Plan and Drainage, Erosion and Sediment Control Plan are discussed in the Decision.

- D. The design review, construction inspections, and necessary approvals prior to and during construction will be provided by Bureau Veritas North America (BV), a fully qualified third party contractor experienced in providing industrial building official services, acting as the Energy Commission's CBO to ensure independent review of the projects.

BUREAU VERITAS AND ENERGY COMMISSION STAFF AGREE AS FOLLOWS:

1. The above recitals are incorporated into this agreement.
2. Bureau Veritas shall act as the Energy Commission's delegate for enforcement of local building codes; the CBSC; the Facility Design, Geology and Transmission System Engineering Conditions of Certification; the SWPPP, and the DESCP, as directed by the compliance project manager (CPM); and other engineering LORS applicable to the project. Bureau Veritas will also be responsible for the design review, plan check, and construction inspection of the foundation, structural features, anchorage, and connections for those building and non-building structures, process-related systems and equipment required for power and steam generation, and equipment located either inside or outside of buildings that are designated in the master drawings and master specifications list described in Civil Engineering conditions of certification. Additions and deletions to the provided list will be made only with the CPM's approval. Bureau Veritas, acting as the CBO for the project, shall carry out these duties with all the rights and immunities afforded the CBO by applicable LORS and codes. The ultimate responsibility for facility design, construction, and operational compliance remains with NextEra.
3. Although Bureau Veritas will function as the Energy Commission's delegate, the Energy Commission has the final authority and responsibility to ensure that the project is built in accordance with the applicable engineering LORS, the Decisions and subsequent amendments. The Energy Commission's legal authority to enforce the terms and conditions of its Decisions is specified in California Public Resources Code section 25500 *et seq.* The Energy Commission may amend or revoke the certification for any facility and may impose a civil penalty upon the project owner for any significant failure to comply with the terms or conditions of the Decision.
4. To ensure compliance with local building codes; the CBSC; the Facility Design, Geology and Transmission System Engineering Conditions of Certification; the SWPPP, and the DESCP, and other applicable engineering LORS, the CBO is authorized to take any action allowed by the California Code of Regulations and law to ensure that the Energy Commission's interests are properly addressed and protected. If the CBO has issued, or is considering issuing, a stop-work order to ensure compliance, to ensure that the Energy Commission's interests are protected, or for any other reason, the CBO shall seek the cooperation and assistance of the CPM. The CBO shall notify the CPM in a timely manner, preferably prior to taking the action, so that the CPM is fully aware of the action taken or under consideration and its implication to the project. For any action taken under emergency conditions, the CPM shall be notified within 24 hours of the action.

5. In the performance of this agreement, Bureau Veritas and its employees and subcontractors shall act in an independent capacity and not as officers or employees of the State of California.
6. The CPM shall have the right to approve the qualifications of Bureau Veritas engineering and technical personnel and the scope of work they will perform. Bureau Veritas shall notify the CPM if there is any change in personnel assigned to the project team. Replacement personnel shall not work on the project until they are approved by the CPM.
7. Bureau Veritas may retain the services of one or more independent qualified subcontractor(s) to supplement Bureau Veritas employees in the design review, plan check, and construction inspection of the project. The subcontractor(s) will answer directly to, and be responsible to, the CBO. The CBO shall provide the qualifications and scope of work of the subcontractor(s) to the CPM for approval at least ten days prior to the subcontractor's expected start of work. The CBO will retain responsibility for the construction inspections required by Appendix Chapter 1, section 109 of the CBSC and for monitoring special inspections required by Chapter 17, sections 1704 and 1707, of the CBSC.
8. Bureau Veritas shall notify the CPM if there is any change in subcontractor(s) or subcontractor's personnel. Replacement subcontractor(s) or subcontractor's personnel shall not work on the project until they are approved by the CPM.
9. Bureau Veritas shall require that its subcontractors have not previously been employed directly by the project owner or its agents at any time during the 12 months prior to the start of this agreement. Bureau Veritas shall also require that during the course of this agreement its subcontractors or its agents will not be directly, or indirectly, employed by the project owner or any entity of which it is a holding, subdivision, or subsidiary.
10. At the request of the CPM, the CBO, its subcontractor(s), and any special inspectors shall assist the CPM in any audits or inspections of the project.
11. Bureau Veritas shall enter into a contract for the project with NextEra for the payment of CBO services provided. These fees shall be based on hourly rates, or as otherwise agreed to by the CBO and NextEra. Payments to Bureau Veritas for work satisfactorily completed may be paid directly to Bureau Veritas in advance, in arrears, or from a credit account established with Bureau Veritas by NextEra. The contract between the project owner and Bureau Veritas shall include a provision that NextEra may not terminate the contract with, or payments to, Bureau Veritas without prior authorization of the CPM. At least ten days prior to execution of the contract between NextEra and Bureau Veritas, the proposed contract must be submitted to the CPM for review and approval.
12. The CBO shall take all reasonable measures to accommodate NextEra's design and construction schedule, including, but not limited to, adding staff to its workforce and/or retaining the services of additional independent qualified subcontractors.

13. The CBO shall review and approve the selection of dynamic analysis and/or alternative methods of analysis for the design of those major structures designated in Facility Design Condition of Certification GEN-2 to comply with the CBSC.
14. The CBO shall review and approve any of NextEra's proposed special and continuous inspection editions of the reporting programs required by Chapter 17 of the CBSC, and other related codes, and shall approve the qualifications and experience of the proposed special inspectors. Where appropriate, subject to CPM approval, Bureau Veritas may accept the results of inspections performed by NextEra's special inspectors.
15. The CPM shall have the right to audit Bureau Veritas and its subcontractors' performance to ensure that they are properly carrying out their duties and responsibilities and that NextEra is implementing the Decision requirements for the design and construction of the project.
16. Bureau Veritas, and subcontractor(s) may discuss all aspects of the project with each other, the CPM, and NextEra's construction contractors and engineers. The CBO and CPM shall have access to all associated construction records, construction and inspection procedures, test equipment, and test results related to the requirements of the Decision. It is the CPM's intention to provide reasonable notice of site visits and audits and to conduct such activities at reasonable times. Circumstances may dictate that site access may be required with little or no notice.
17. The CBO shall provide weekly reports on the status of construction of the project to be posted to the project website (see below). The reports shall include: executive summary of current issues; general activities occurring at the project site; the completion percentage of overall construction; compliance issues with applicable LORS and applicable conditions of certification; issues of concern with or by NextEra; status of interconnections; scheduled activities for the following week; and potential delays to the on-line date of the project. Many of the information requirements of the weekly status report may be satisfied by updating fields on the project website on a weekly basis.
18. The CBO shall create and maintain a password-protected project website for the posting of the weekly reports and other project documents. Documents on the website will be posted in a Microsoft Word-compatible format or as a portable document format (pdf) file. The project website shall include the following information in an easily navigable format: all components of the weekly status report; a minimum of ten dated project photographs of current construction activities; list and status of submitted plans; status of field inspections; new subcontractors or key CBO personnel; and documents submitted for CPM review and/or approval. The CPM will be notified of new documents posted to the project website by e-mail with an active link to the document.
19. The CBO shall submit the results of all plan checks and construction inspections, including recommendations, to NextEra and send a copy of all transmittal letters to the CPM. The CPM shall conduct any technical audits and reviews and present

any recommendations as expeditiously as possible. The CBO should proceed with reviews and approvals of all components designated in the amendment petitions and approvals in accordance with any additions and deletions approved by the CPM, unless instructed otherwise by the CPM. Approved plans, specifications, calculations, and marked-up as-builts shall be retained by the CBO for 90 days from the date of completion of construction of the project, after which the CBO shall deliver them to the project owner for long-term retention at the project site or other accessible location as required by conditions of certification in the Civil Engineering section of the Decisions. Electronic copies of the approved plans, specifications, calculations, and marked-up as-builts and other relevant submittals shall be provided to the CPM, in the form of compact discs, within 90 days of completion of construction on the project.

20. The Energy Commission, through the CPM, retains the final authority over all matters relating to interpretation of the Conditions of Certification.
21. The term of this agreement (MOU) is indefinite, but shall terminate when all of the mutual obligations have been performed and satisfied. It shall also terminate at such time as NextEra fails to pay fees as required or renders Bureau Veritas' performance under this agreement impossible. Notwithstanding the foregoing, Bureau Veritas or the Energy Commission may terminate this agreement upon five (5) days advance written notice complying with the provisions below (refer to item 22).
22. All correspondence regarding this agreement, including invoices, payments, and notices, shall be directed to the following persons at the following addresses and telephone numbers:

CBO: Kevin Wedman, CBO, Vice President
Bureau Veritas
180 Promenade Circle, Suite 150
Sacramento, CA 95834
916-617-2028

ENERGY COMMISSION: Chris Davis, Compliance Project Manager
California Energy Commission
1516 9th Street, MS 2000
Sacramento, CA 95814
916-654-4842
CMDavis@energy.state.ca.us

Written correspondence shall be sent either by personal delivery (including overnight delivery service), by U.S. Mail, fax, or e-mail. It shall be considered delivered when actually received.

23. This memorandum of understanding shall be effective upon execution by all parties.

24. In the event of a conflict between this MOU and a Decision granting approval of the amendment petition, the Decision shall take precedence.
25. This agreement shall be interpreted and applied in accordance with California law. Any litigation concerning it shall be brought in the Sacramento County Superior Court.
26. This agreement sets forth the parties' entire understanding and supersedes all prior agreements and representations, written and oral, and may be modified only by a written document signed by Bureau Veritas and the Energy Commission.

Bureau Veritas has reviewed this MOU and understands its duties and responsibilities.
