Transmission Needed to Meet State Renewable Policy Mandates and Goals

May 17, 2011 – 9:00 a.m., Hearing Room A

AGENDA

Introduction

Suzanne Korosec, IEPR Lead

Opening Comments

Chair Robert Weisenmiller, Presiding Member

Commissioner Karen Douglas, Associate Member

Michael Picker, Governor Brown's Senior Advisor for Renewable Energy Facilities

Staff Presentation: Workshop Overview, Goals, and Next Steps

Judy Grau, California Energy Commission

Transmission System Plans for Interconnecting Large-scale Renewables in California

Neil Millar, California Independent System Operator

Mohammed Beshir, California Transmission Planning Group

Panel Discussion #1: Challenges to Interconnecting Renewables to the Transmission System and Recommended Actions

What progress has been made and what challenges (including resource adequacy/deliverability) have been encountered to date in the licensing and/or development of transmission infrastructure that facilitates renewable generation, including ARRA-funded projects?

Jon Eric Thalman, Pacific Gas and Electric

Robert Woods, Southern California Edison

Will Speer, San Diego Gas & Electric

Stephen Keene, Imperial Irrigation District

Mohammed Beshir, Los Angeles Department of Water and Power

Lorenzo Kristov, California Independent System Operator

Anne Mills, California Public Utilities Commission

Staff presentation: Western Interconnection Regional Planning: Transmission and Renewables

Grace Anderson, California Energy Commission

Public Comments

Lunch (11:45 – 12:45)

Panel Discussion #2: Observations and Recommended Actions to Ensure Timely Transmission System Upgrades for Renewable Generation

- 1. What changes do you recommend be made to the existing transmission planning, permitting, and construction processes to ensure that appropriate, timely transmission upgrades that support renewable generation are completed?*
- 2. What additional changes would enable the planning-permitting-construction cycle to be shortened to no more than three years¹ without sacrificing the quality of the decisions?*

Carl Zichella, Natural Resources Defense Council

Tony Braun, Counsel to California Municipal Utilities Association

Neil Millar, California Independent System Operator

Mohammed Beshir, California Transmission Planning Group

Anne Mills, California Public Utilities Commission

Ziad Alaywan, Z Global

V. John White, Center for Energy Efficiency and Renewable Technologies

Darius Shirmohammadi, California Wind Energy Association

Robert Jenkins, First Solar, Inc.

Public Comments

Closing Remarks

Adjourn 2:30 p.m.

¹ Governor Brown's Clean Energy Jobs Plan states the following: "The [Energy Commission] should 'fast-track' projects based on their anticipated ability to deliver clean energy to market. The permitting time for these projects – which now can take 6 to 8 years – should be dramatically reduced, and in no case be longer than three years." Furthermore, the Plan states that "As Governor, I will ensure that all agencies involved work together with a sense of urgency to permit the new transmission lines without delay."
