**Subject:** comment for docket No. 11-IEP-1J

---

**Dear Commissioners, a sub-committee of this organization has been studying energy production by nuclear power for 40 years. 1) we recommend that Diablo Canyon and San Onofre be shut down immediately and at the same time vigorous moves be made toward a) conservation of energy, and b) phasing in of alternative sources such as wind and sun; 2) we recommend that spent fuel storage be changed from pools of water to dry casks; 3) we recommend that serious prosecution follow discovery of safety violations; 4) we recommend that planning for evacuation in case of an accident be reviewed for feasibility given limited road access and in the light of multiple disasters. Sincerely yours, Reverend Albert G. Cohen.**
