DOCKET**11-IEP-1J**

DATE JUL 23 2011

RECD. JUL 25 2011

Thank you for the opportunity to comment on nuclear reactors and California.

It is my strong belief that the time has come to phase out California's nuclear reactors.

There is still no solution for long term storage of radioactive spent fuel rods, though they are being produced in record numbers.

The emergency evacuation plans for California's reactors are inadequate. They must be reviewed, and costs/repercussions reexamined. Our own NRC recommended a much larger evacuation area in Japan than what is currently planned for in Diablo Canyon and San Onofre's highly populated areas.

Given the tragic incidents at Chernobyl, Three Mile Island and Fukushima, it is now clear that nuclear plants can be rendered unusable by seismic event or other natural disasters, accidents, or even acts of malice or terror.

The "unthinkable" can become a reality, and a tragedy on the our side of the Pacific Rim as well. No amount of energy generated from nuclear power is worth this risk. For these reasons I respectfully request nuclear reactors be shut down on California's coast.

Mrs. Korby Siamis
Los Angeles, CA

The time has come to shut down California's Nuclear Reactors:

1. There is still no solution for longterm storage of radioactive spent fuel rods, though they are being produced in record numbers.
2. The emergency evacuation plans for California's reactors are inadequate. They must be reviewed, and costs/repercussions reexamined. Our own NRC recommended a much larger evacuation area in Japan than what is currently planned for in Diablo Canyon and San Onofre's highly populated areas.
3. Following incidents at Chernobyl, Three Mile Island, and Fukushima, it is now clear that nuclear plants can be rendered unusable by seismic event or other natural disasters, accidents, or even acts of malice or terror.

The "unthinkable" *can* become a reality, and a tragedy on the our side of the Pacific Rim as well. No amount of energy generated from nuclear power is worth this risk. For these reasons I respectfully request nuclear reactors be shut down on California's coast.

Sincerely,

Kim Perl, M.D.,

California Resident

The time has come to phase out California's nuclear reactors. All of us who live in the area which could be affected by a nuclear disaster are VERY CONCERNED!

1. There is still no solution for longterm storage of radioactive spent fuel rods, though they are being produced in record numbers.
2. The emergency evacuation plans for California's reactors are inadequate. They must be reviewed, and costs/repercussions reexamined. Our own NRC recommended a much larger evacuation area in Japan than what is currently planned for in Diablo Canyon and San Onofre's highly populated areas.
3. Following incidents at Chernobyl, Three Mile Island and Fukushima, it is now clear that nuclear plants can be rendered unusable by seismic event or other natural disasters, accidents, or even acts of malice or terror.

The "unthinkable" *can* become a reality, and a tragedy on the our side of the Pacific Rim as well. No amount of energy generated from nuclear power is worth this risk. For these reasons, I respectfully request the nuclear reactors be shut down on California's coast.

Sincerely,

Lisa Roberts
