<b>DOCKET</b>	
<b>11-IEP-1J</b>	
DATE	JUL 25 2011
RECD.	JUL 25 2011

Dear Commissioners:  
**1J**

Subject: **Comment for docket No. 11-IEP-**

Concerning our reliance on nuclear energy, the consequences are too grave to ignore responsible voices opposed to nuclear power. We need to use the precautionary principle when making a decision on our nuclear energy infrastructure. The Alliance for Nuclear Responsibility recommendations should be adopted. These include studies by SCE and PG&E to determine how they would replace 4400 MW of base load generation; recommend that the U.S. Department of Energy explain why our states should risk another 20years of radioactive waste production; review liability under Price-Anderson (\$12.6 billion, etc.

In other words we do not and should not be using any more dangerous and unsustainable nuclear power. The risks are too great.

Sincerely,

Denise D'Anne
