<b>DOCKET</b>	
<b>11-IEP-1J</b>	
<b>DATE</b>	<u>AUG 01 2011</u>
<b>RECD.</b>	<u>AUG 01 2011</u>

I am a resident of San Clemente. I have made my home here for the past 13 years. I have grown to love the community. In my work and personal life safety is a big focus. I have led, participated and promoted safety campaigns in different areas through the Community Alliance Network, San Clemente Task Force for Youth & Families and the San Clemente Collaborative - a consortium of community-based organizations. We have held forums on community issues and emergency preparedness with the collective emergency-related agencies. There is a deep concern for the safety of our community living close to SONGS. We do not have a strong emergency evacuation plan, especially regarding our schools. Our children and community are at such a high risk in an event that would cause us to evacuate. With all the research and latest events in Japan and other areas we understand fully and live with the fear of the damage an earthquake could do.

I believe very strongly now is the time to shut down the San Onofre nuclear power plant. I hoped with Germany as a leader shutting down their nuclear plants we as an evolved group would do the same. It doesn't make sense to have this toxic waste and probability of it leaking into our air, water, etc. There is too many green alternatives. Along with being a community member I am a mother, wife, grandmother, and sister who is working the best I can to contribute to a healthier and safer earth for all. I try to feel prepared however I truly don't believe there is any effective planning for a tragedy like that of Japan. Prevention is the best answer. I love where I live and would be so proud to live in a place where our leaders and decision-makers took steps to secure our safety. While we have alternatives, please put them in place before it's too late. Please replace this out dated dangerous plant and move to a more sustainable safe way of providing energy.

Sincerely,

Laura I Muesse
