Hello.....I am very disturbed about the dangers of living next to SONGS.....It is not designed for the earthquake that we are expecting to day, and I was quite surprised when I found out about the accumulated waste being stored.....and what about an evacuation? Millions of people would have many health problems, and lose property, which is usually most of their life savings.....and what about children.....what if it was your family living there with your children and also grandchildren.....would you look at the situation in a different manner.....I was in the SF earthquake in 89....and it was the worst thing that ever happened to me, and there wasn't a nuclear plant or a tsunami.(sp).....I have read that we also have a poor safety recordI live in San Miguel MX part time and feel safer here.....sincerely ,
Karen Hafer
