Subject: Comment for docket No. 11-IEP-1J

Please, please do not build this powerplant. As a government and community, we *have* to start taking responsibility for the safety of ourselves and future generations and just can't keep building more and more unsafe power solutions to satisfy the unchecked, irresponsible appetite for power. There are many far more safer solutions to our power problems/shortages that the public wants to pursue -- that will not put us, our kids and our environment at the serious risk that is inherent and inescapable with nuclear power. Please take and show leadership in this area to the rest of our country and the world.
