As a t residence of City of San Clemente for the past 9 years, I would like to request the complete and immediate shut down of SONGS.

As every body is already aware, we in the Cityof San Cemente are all living next to a time bomb, which can, without any warning, go off at any time, and after that due to SONGS operation the loss to Southern California, and California's Gold Coast as we know it , as well as all the projected property damage within the 80 Miles in each direction, will by far exceed all the financial projections I have seen to date.

It is no longer a choice of will it be safe, SONGS is not and will not be Safe.

After what we have all witnessed in Japan, the people living in the 80 miles area are all affected and their life will never be the same.

Therefore in light of what we have all witnessed in Japant no one of sound mind should think otherwise, that we will be OK?

It is obvious that Southern California Edison executives are only looking after their own financial interest, and no one should expect anything else from them or their representatives.

It is time to bite the bullet, and shut this operation and be done with it.

We are already paying more than twice for the cost of Electrical Power in The Edison Territory on average \$0.10 per KWH compared to what is paid by the East Coast Consumer, which is US\$ 0.04 to US\$ 0.05 per KWH and there is plenty of Electrical Power generating capacity available for us to purchase to replace SONGS capacity.

Time is of the essence.

Don't prolong this process, what is obvious is this plant was not designed to last this long or to withstands a magnitude 7 and up Earth Quake.

Please use your common sense and terminate SONGS operating license due to safety reasons.

Thank you for your logical consideration.

Sincerely,

*Shahrokh Mirjahangir
