Subject: Docket number 11-IEP-1J "California Nuclear Power Plant Issues" San Onofre Nuclear Generating Station

Dear Commissioners,

In your decision making regarding the continuance of nuclear power as a viable energy source, please consider the following:

- San Onofre Nuclear Generating Station stores several times the amount of spent fuel that was at Fukushima, yet San Onofre has the second worst safety record of all U.S. nuclear power plants
- San Onofre Nuclear Generating Station sits near several fault systems that are due for a major earthquake according to the USGS.

The future implications of this precarious situation are catastrophic in nature. As a citizen of Southern California, I urge you to take this information into consideration and steer your efforts to eliminate the nuclear power option, especially at San Onofre, while developing safer forms of energy generation.

Thank you.

Sincerely,
 Dianna Nunez
 399 Hillcrest Drive
 Encinitas, CA 92024
