DOCKET**11-IEP-1J**

DATE _____

RECD. Aug 03 2011

To the members of the California Energy Commission -
I am a long time resident of San Clemente and have always been concerned about our next door neighbor - SONGS. What have they done to deserve an extension of operation until 2022? Have they made it more earthquake safe? Have they found a storage sight for the 4,000 tons of radioactive waste? Is it even possible to create a realistic evacuation plan?

My last question and one of my biggest concerns is one that no one even thought about when the plant was built - how can we protect it from a terrorist attack? It is a prime target. A successful attack on the plant could wipe out Southern California. The ramifications of that are unthinkable - and not just for those of us that live here. With so much at stake, we must err on the side of caution. Close down SONGS!!

Thank you,
Marilyn Wigglesworth
