DOCKET**11-IEP-1J**DATE Aug 04 2011RECD. Aug 04 2011

I encourage you to consider de-commissioning San Onofre Nuclear Generating Staion

Hopefull, we have learned from the tragedy in Japan where an earthquake caused dangerous nuclear waste to harm thousands, if not Chernobyl and 3 Mile Island.

SONGS is only rated safe for a 7.5 quake, when scientists tell us an 8.0 or above quake, many times more poerful, is overdue

This would cause the evacuation, and possible inability to return, of millions of people who live in the area of SONGS

SONGS accumulates 500 lbs of nuclear waste daily and now has 4000 TONS of waste.

SONGS only produces a small percentage of the required power for the area, and this could be supplied easily by green alternatives

Thank you for you attention to this matter
