Dear CEC,

In reference to Docket No. 02-REN-1038, Staff Workshop on Possible Changes to the Emerging Renewable Program Guidebook.

Please be aware that I have been caught in the middle by one of your actions and wish to find a resolve ASAP. I filed for my rebate in February of 2011 and have been on hold since you froze the program. This has put me in financial difficulty as your program was to pay out the rebates, a few weeks after filing. I can understand closing a program to new participants, but to penalize a who person who acted in good faith based on your published literature, is profoundly unfair and possibly illegal. I entered this energy rebate program based on the information I had and suddenly the rules change with me bearing the full burden of your decision.

Please advise me as to how and when I will be reimbursed as I have been out of pocket for many months.
Thank you,

Eric Habben
