Dear Mr. Raine,

The Energy Commission is in receipt of DyoCore's Response to Complaint of California Energy Commission. Upon review, it appears the document is incomplete because it does not contain proof that it has been properly served as required by California Code of Regulations, Title 20, Section 1233(a).

The Proof of Service (available at http://www.energy.ca.gov/renewables/emerging_renewables/11-cai-03/documents/2011-07-28_Initial_docketed_Proof_of_Service_TN-61565.pdf) should be used to properly serve those required under Section 1233(a).

The Response will be considered complete and appropriately filed on the date that the Response, with the required Proof of Service, is received by the Energy Commission.

Sincerely,

Jennifer Martin-Gallardo
