DATE AUG 22 2011

RECD. AUG 25 2011

Dear _____

The staff of the California Energy Commission and BrightSource Energy would like to invite you to participate in an on-site visit to the project area for the proposed Hidden Hills Solar Electric Generating System, a solar power plant under consideration for the Calvada Springs area. The proposed project is expected to be submitted for review by the Energy Commission on August 3, 2011 or later. The site visit is scheduled for August 2, 2011 and will begin with a meeting at 11:00 a.m. in Pahrump, Nevada. Food and beverages will be provided, and provisions have been made for partial defrayment of your gasoline costs to and from the visit. Please take a look at the preliminary agenda for the day that is attached to this letter. If you have other discussion items that you would like to see added to the agenda, please either let me know by return email or just let me know in person the morning of the August 2 meeting.

Energy Commission staff would like to understand how the proposed project may disturb the way that the Native American community experiences the landscape in the broad area around Calvada Springs and any concerns specific to the proposed project site. The way that the Energy Commission looks at the potential for this kind of disturbance is to discuss what the proposed project would look like from a number of Key Observation Points (KOPs). The Energy Commission staff will use the KOPs in before and simulated after-views provided by the applicant of the project are, and then refer to these images in a written discussion of how the proposed project would disturb views of the landscape around the project area. We appreciate your help to make sure that some of our KOPs capture landscape views that are important from a Native American perspective, views that Energy Commission staff simply may not be aware of or may not be able to see. Energy Commission staff want to understand and consider any concerns that the Native American community may have about this proposed project and how it may disturb the visual experience of the landscape that would surround the project.

The site visit that we are planning will be in addition to the usual cultural resources consultations that will take place with Energy Commission cultural resources staff, as required under the California Environmental Quality Act (CEQA), and with Nevada BLM cultural resources staff under the National Environmental Policy Act (NEPA) and Section 106 of the National Historic Preservation Act. The August 2 site visit is to help Energy Commission staff gather information for a visual resources analysis under CEQA. It is our hope that you will see this as an opportunity to help us understand other Native American concerns that may not fit easily into our normal cultural resources

analysis. We look forward to talking with you about this aspect of the project and hope that you are able to attend. If you have any questions, please feel free to call Melissa Mourkas at (916) 654-3877 or e-mail at: mmourkas@energy.state.ca.gov.

Please let us know by July 29 if you will be attending.

Sincerely,

Melissa Mourkas, ASLA
