Re: Docket No. 11-IEP-1J, California Nuclear Power Plant Issues

Pacific Gas and Electric Company (PG&E) would like to revise one paragraph of its August 9, 2011 comments on this topic. More specifically, at page 12, the second response, PG&E would like to modify the first paragraph to read as follows:

PG&E procures to meet a planning reserve margin requirement (PRM) of 15% to 17%. The PRM provides some level of protection for extended outages of Diablo Canyon. ~~PG&E maintains adequate reserves to replace power from a Diablo Canyon unit if an outage lasts longer than 90 days.~~ PG&E would either dispatch its own resources or purchase market power, if lower cost, to provide replacement power during the outage. PG&E may also rely on the forward markets to provide replacement power if the cost was lower than its own resources.

Should you have any questions or need additional information, please contact me at 415/973-3839.

Sincerely,
