2/21/2012

To Whom it may Concern:

This email is in regards to 11-AFC-03 Quail Brush Power Generation siting case. We are very concerned about this power plant being built in this area. We barely received any type of notification as a public. Most people still have no idea. We live very close to the proposed site, and are extremely upset at the fact that this power plant will be across the street from us. It is dangerous, directly across the street from a public park and a school, in which children would be subjected to the toxins released from the smoke stacks. As well as children in our neighborhood and our home, having to be around this dangerous and toxic pollution. It should be in a completely different area, away from living residences, parks and schools. It will lower our property values extremely, which is a tragedy. Please consider a **No Project Alternative that considers conservation strategies.**

Thank you,

Tara Chaparro
West Santee Resident
