**12-IEP-1B**

DATE FEB 23 2012

RECD. FEB 23 2012

### Summary

- Slightly lower consumption and sales growth compared to previous forecasts
- Higher peak demand growth compared to previous forecasts
- Climate change adds 350-450 MW of peak demand by 2022 (1.3-1.6%); PV adoption reduces peak by 600-700 MW by 2022 (2-3%)
- TV standards reduce consumption by 1,000 GWh in 2022 (0.8%); EVs increase consumption by 1,000-2,000 GWh (0.8-1.5%) in 2022

## California Energy Commission

# PG&E Electricity Consumption

Average annual growth 2011-2022: 1.9% in high case, 1.0% in low case

## California Energy Commission

# PG&E Electricity Consumption

**Average annual growth 2011-2020: 1.22% in revised mid, 1.31% in preliminary mid, 1.23% in CED 2009**

## California Energy Commission

# PG&E Electricity Sales

**Average annual growth 2011-2022: 1.8 percent in high case, 0.85% in low case**

## California Energy Commission

# PG&E Electricity Sales

**Average annual growth 2011-2020: 1.16% in revised mid, 1.23% in preliminary mid, 1.21% in CED 2009**

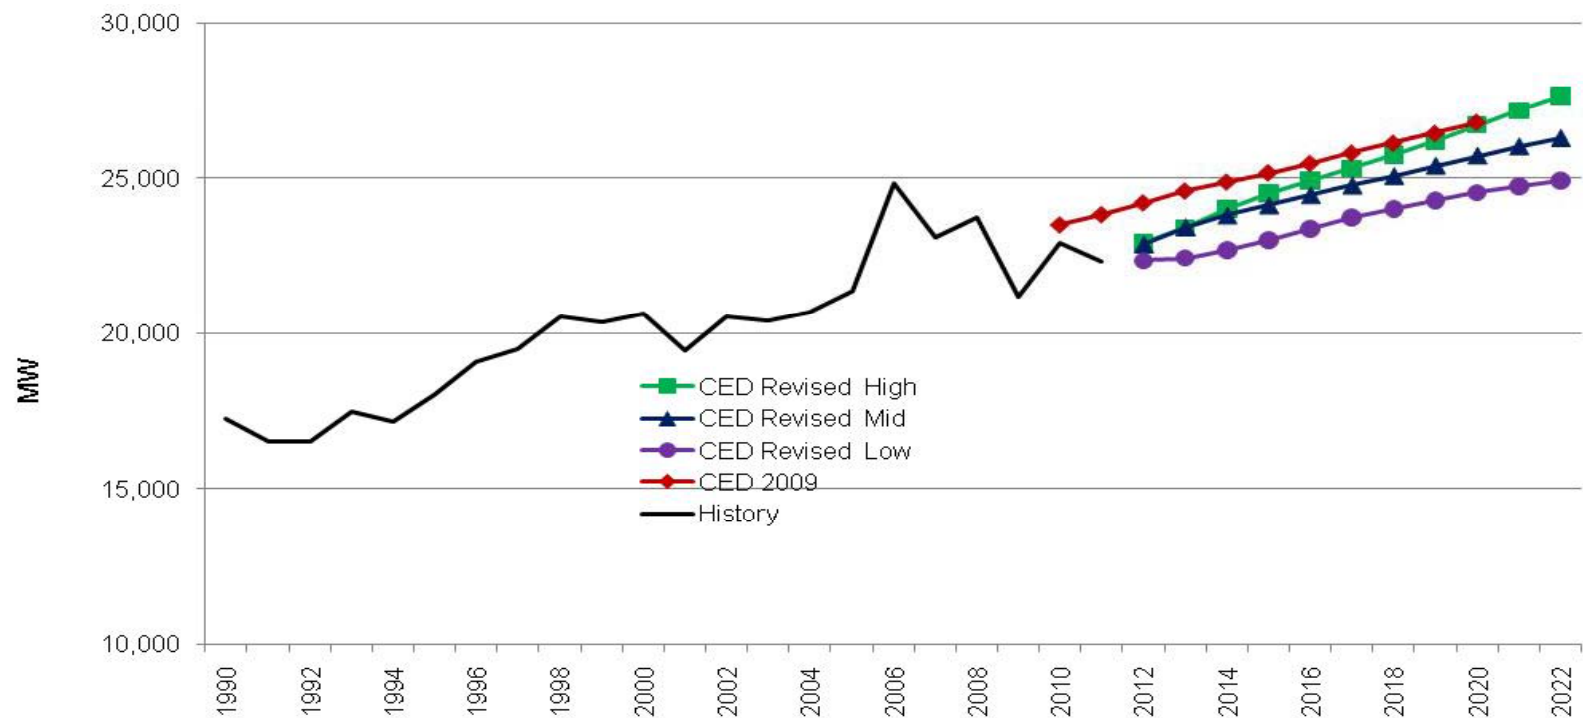

## California Energy Commission

# PG&E Peak Demand

**Average annual growth 2011-2022: 2.0% in high case, 1.0% in low case**

## California Energy Commission

# PG&E Peak Demand

**Average annual growth 2011-2020: 1.59% in revised mid, 1.22% in preliminary mid, 1.33% in CED 2009**

## California Energy Commission

# PG&E Load Factors

**CED 2011 Revised similar to preliminary by 2013**

## California Energy Commission

# PG&E Per Capita Consumption

EVs push per capita consumption up toward the end of the forecast period

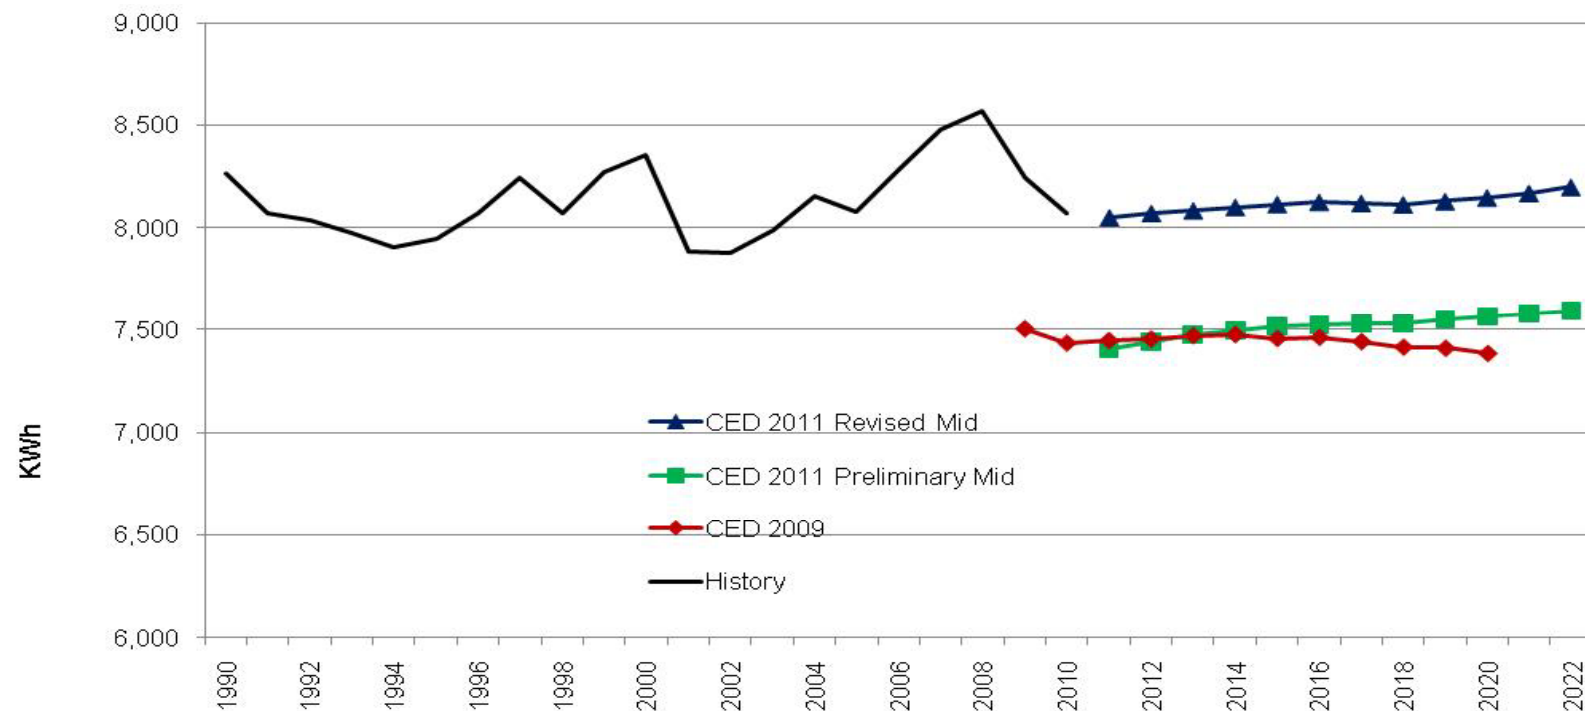

## California Energy Commission

# PG&E Per Capita Consumption

Population adjustment pushes per capita consumption above CED 2009 levels

## PG&E Forecast: Factoids

- Of three major sectors, growth in consumption is fastest in residential sector (1.64% per year 2011-2022 in mid case), followed by commercial (1.53%), and industrial (0.30%)
- Strongest growth in construction energy use among all planning areas, increasing industrial sector growth
- Average annual growth 2011-2022 in agricultural and TCU/streetlighting sectors slightly less than 1 percent

## California Energy Commission

# Key Input: Household Population

## Slower growth 2011-2020 in CED 2011 vs. CED 2009

## California Energy Commission

# Key Input: Income per Household

Faster growth in mid and high cases vs. CED 2009

## California Energy Commission

# Key Input: Commercial Floorspace

Lower starting point, faster growth vs. CED 2009

## California Energy Commission

# PG&E Electricity Sales: CED 2011 Revised vs. Econometric Forecast (Mid Case)

**Econometric 0.15% higher in 2022**

## California Energy Commission

# PG&E Peak Demand: CED 2011 Revised vs. Econometric Forecast (Mid Case)

**Econometric 2.7% higher in 2022**

## California Energy Commission

# PG&E Efficiency Impacts

10.5-12.5 k additional GWh savings 2011-2022

# PG&E Self-Generation Peak Impacts

## PV Peak impacts increase by 300-400 MW 2011-2022

## California Energy Commission

# PG&E Electric Vehicles

700 GWh lower in mid case compared to preliminary forecast mid case
