Subject: STATUS REPORT #11 FOR THE SUN VALLEY ENERGY PROJECT (05-AFC-3)

Dear Mr. Worl,

Pursuant to the terms of the Commission's Order Suspending Proceeding dated May 31, 2011, Valle Del Sol Energy, LLC submits Status Report #11 for the Sun Valley Energy Project. The Sun Valley Energy Project (SVEP) is a 500-megawatt natural gas-fired peaker plant that will be located in the City of Menifee, California. The site is located on 50 acres of former farm land 30 yards southwest of the Valley Substation and will feature five General Electric LMS-100 gas turbines.

Previously, the Commission inquired about the status of the temporary railroad crossing application that was submitted to the Riverside County Transportation Commission (RCTC). We are actively researching this matter and will be contacting you soon to update you on our findings.

Additionally, Valle Del Sol is continuing to monitor the PM₁₀ and SO_x ERC shortage that is affecting the entire SCAQMD region and is preventing us from gaining the certification necessary for the project to advance. We are committed to working with the Commission and SCAQMD to identify a solution. Recently we attended the SCAQMD Stationary Source Committee and Home Rule Advisory Committee Meetings. We also plan to attend the upcoming Governing Board Meeting and any additional meetings or workshops related to the emission offsets issue. We greatly appreciate the Commission's assistance in this matter, and we will continue to provide you with updates on any changes relating to the progress of the SVEP.

Sincerely,

Heather MacLeod
