Why YOU Must Oppose The Quail Brush Power Plant - Santee, CA Patch

OOhhhhhhhhh please..... This city doesn't need a power plant in its midst's..... We get enough pollution blowing in from all around us beings we sit on just about the lowest area of San Diego County! With the completion of Hwy's 52, 125, & 67 everything just settles right down here in our little valley. I live on Carlton Oaks Dr. one of the busier residential streets in Santee & you wouldn't believe the dirt & junk I wipe from my windows & blinds daily, just from the traffic & now they want to add this atrocious thing to contribute to all that plus not even mentioning what it will do to us, our children & animals, health wise.. I already have breathing problems & sure don't want to add to them.. I was also under the impression that property was designated as part of San Diego county's wild lands.. Santee has already grown enormous amounts in the past two decades & crammed in way to much in such a small area.. Progress is great, but there comes a time when you have to "HOLLER, STOP"!!
Sincerely,
Patricia A. Welch
