RECD. MAR 13 2012

With regard to the above-mentioned, please consider the "No Project Alternative that uses conservation as a strategy."

I live less than one mile from the site of the proposed power plant and would experience direct harm from it in multiple ways. Under no circumstances do I wish for it to be built at the proposed location. Furthermore the plant as proposed would compromise Mission Trails Regional Park, pollute the valley we are in, prove unsightly in a region of great natural beauty, cause more traffic congestion, and have more bad consequences.

I personally "walk the walk" insofar as conservation is concerned -- I installed solar panels on my roof. Conservation is a real alternative and should be taken.

"No" to the proposed plant.
