To whom it may concern,

I moved to Santee almost 10 years ago. What a beautiful city we have. The best of both worlds. We have enough within our city to allow us to support our own economy and not leave to give other cities our money. We have the beautiful hills and trails to allow our families to enjoy. I hear of a power plant and it saddens me for my own children. I want them to grow up in a healthy beautiful environment and hopefully be able to continue to live here as they grow older. I don't care about the politics of all of this. We already have a horrible womens jail facility and a smelly landfill..what more do you want to do to ruin this beautiful city?? I don't care that "they" say they are covering all of the basis to keep the air healthy etc. This is not good for our community or any other city for that matter. Look at the potential dangers that San Onofre is posing on the citizens of San Diego and it's sitting right next to our beautiful ocean. There are alternatives..that's not my job to figure out. But I do know this..this is wrong!! Watch The Lorax and that is what this reminds me of. I pray my children and their children will have some nature and fresh air left after all of the destruction humans are doing to it.

Thank you for your time,
 Veronica Hobbie
