I would like you to consider the "No Project Alternative". The area under consideration for the site is one of the few remaining areas in San Diego that has not been blemished by human encroachment. This area has maintained a truly separate "outdoor identity" in San Diego for many years. It has become a wildlife preserve, and a camping and hiking get away for thousands of residents. This is a beautiful area that should be left alone. Why they have chosen this one area to destroy with a power plant is beyond me. Pollution, reduced housing prices in an already depressed market, a visual blight, and endangered wildlife are only a few of the negatives related to this site selection. Has any consideration been given to locating the plant in an area where there would be less environmental impact? How needed is this plant? I for one will conserve more energy if that is what it takes to eliminate this site from consideration.

Regards,

Rick Hartegan
