RECD. MAR 19 2012

Mr. E. Solorio,
 CEC Project Manager

RE: CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case.

Thank you for taking the time to read this correspondence. The Quail Brush Power Generation Facility that has been proposed on the eastern rim of San Diego causes me great concern. As a Registered Nurse the health risks to the public outweigh the benefits created by the electricity generated by the facility.

My primary concern is for the health of at risk populations. These populations include children and the elderly. Children's lungs are not completely developed making them susceptible to many respiratory ailments. West Hills High School, Carlton Oaks Elementary School, and Sycamore Canyon Elementary School are all dangerously close to this proposed power plant. Additionally, elderly people have less health reserve to resist the effects of pollution in their environment. Many thousands of elderly live in the proximity of the proposed power plant. Many of these individuals have chronic respiratory conditions that will be exacerbated by the emissions of the power plant.

Please consider the no power plant alternative and protect the health of these at risk populations.

Sincerely,

Stephen Houlahan, RN, MSN, MBA
