Subject: "CEC record□Docket #11□AFC□03 Quail Brush Power Generation Siting Case."

My name is Rozina Hirani and I've been a resident in Santee for approximately 3 years. I worked very hard to purchase my condo as a single person. I have family that lives in Tierrasanta, my sister with her 2 kids and my brother with one 4 year old and another one on it's way! I cannot support this project in my right mind! There's absolutely no data provided for any long term health affects! I am an avid hiker and frequent Mission Trails Park regularly. There is absolutely no way that this can be healthy for the plant and animal life in the park and the people in the community! I propose considering the "No project alternative that uses conservation as a strategy"!! I believe that the Quail Brush Power Plant (11□AFC□03) would violate numerous land use plans, regulations and would be an unacceptable eyesore and health risk to Santee and Tierrasanta. Please reject this project for the sake of people, specially Santee's future generation, our kids!! This is completely unacceptable that we did not get to vote against this abomination!!

NO to this project!!
