**Subject:** "CEC record-Docket #11-AFC-03 Quail Brush Power Generation Siting Case."

I am concerned about the proposed Santee Power Plant's location and effects. It will be very close to homes, schools and parks and could cause pollution and many ill effects. As a Santee homeowner and parent, I am concerned that the proposed Santee Power plant could have negatives effects being so close to our homes in Santee. I am also concerned that West Hills high school and several Santee K-8 schools, will be downwind of the plant and have negative effects on the students and staff there.

The effects of pollution could affect air and water quality in the local area and beyond. It also could affect wildlife at the Mission Trails park and surrounding area. Mission Trails Regional Park is a valued asset and a Power plant next to the park could really mar it.

The overall impact of the Santee Power Plant's location so close to Santee, would negatively affect homeowners and residents of our community.

\*Please do what you can to vote no and say no to the Power plant. Please stand up for the quality of life and future of Santee residents, families, West Hills High School and Santee School district students. Please also realize how it could affect the wildlife of Mission Trails Park. Please help stop the power plant and preserve our quality of life for now and future generations.

Thank you!
