2011-2012 Investment Plan
Docket #: 10-ALT-1

DOCKET	
10-ALT-01	
DATE	_____
RECD.	MAR 28 2012

Hello,

My name is Billy Dickson, and I am currently running a business that focuses on converting the Hollywood, CA based Film Industry into a greener and more environmentally friendly business.

Hollywood's film industry is home to the nation's biggest entertainment companies, almost all are still utilizing gasoline powered vehicles to transport their vast amounts of filming equipment on a daily basis. :(

I am also a cameraman, photographer & Moorpark, CA small business owner for over 3 years. I am looking to purchase ZERO- emissions commercial electric medium and heavy- duty trucks to start taking the place of those current & harmful gasoline trucks being used today all over the industry. Major movie studios look to nearby businesses, like me, to rent their gasoline powered vehicles every time they have a shoot, and I am on a mission to change that to a more energy efficient system!

My business, I founded in 2009, which just recently added 5 new full-time and part time jobs to Ventura County (AND looking to expand), delivers Lighting & Camera equipment to film sets and various shoots all around Los Angeles. From NBC, FOX, CBS, prime time television shows to independent short films, college university projects for CSUN, USC, LMU, union commercials and promos, and even non-union children television shows. We do a lot of driving.

Therefore, I am looking for more information on receiving California incentives, loans, grants, financing options and/or rebates to allow this company to grow, add jobs & succeed at improving our environment and our society. :)
