DOCKET

11-AFC-3

DATE APR 10 2012

RECD. APR 11 2012

My name is Eliana Moustakas. I live on Big Rock Road, which is a little more than a mile from the proposed site of the Quail Brush Power Plant. I've attended West Hills High School all four years, and as a senior there with siblings, relatives, and friends that are currently or will attend the school later I would like you to please add me to the list of concerned citizens who oppose the proposed Quail Brush Generation Plant on the grounds that the proposal is a poor use of the land.

The proposed QBGP is inconsistent with many of the City of San Diego's laws, ordinances, regulations, and standards (LORS). The project conflicts with: the East Elliott Community Plan, which designates the site as Open Space; the General Plan, which designates the site as Park, Open Space, and Recreation; and the Municipal Code, which designates the site's zoning as single-family residential (RS-1-8). The proponents of the plant must obtain a community plan amendment, general plan amendment, and rezone from the City of San Diego. The proposed project is also located within the City's Multi-Species Conservation Program (MSCP) Subarea Plan, with which it is incompatible. To make the project consistent with the Subarea Plan, the applicant would need to obtain from the City a boundary line adjustment of the MultiHabitat Planning Area to exclude the project site.

The Taxpayers of San Diego County object to any further spending of California taxpayer dollars in pursuit of a project that violates so many key local land use provisions.

Additionally the power plant siting threatens the well-being, health, recreation, natural beauty, quite, property value and quality of life of all San Diego county residents who use Mission Trails park or who live in the areas of Navajo, Tierrasanta and Santee due to the proximity to parks and residences.

I urge the CEC to implement the No Project Alternative.
 Feel free to contact me further on the topic.
