**Subject:** Quail Brush Heart Disease Illnesss

TO: CEC and other agencies,

June 1, 2012,

I am 87 in July, I have aorta valve replacement and chronic heart disease, I and Rose (respiratory illness) live a few blocks away from the power plant. Cogentricks claims that measuring a baseline air quality in Santee is not relevant and it would be insignificant. This is a factual error in my case, I am seriously affected by air pollution, you can not mitigate away my age, health condition and illness. We have lived here for many years and we want to be able to walk in our park and breathe the air without fear of grave harm. I am active in the senior community and am personally acquainted with at least 25 seniors that have either chronic heart disease or respiratory illness as well as other ailments common to the elderly. There is a very high percentage of senior citizens living near the power plant and near very polluted areas of Santee near Mission Gorge Rd and Hwy 52, there are many senior retirement mobile home parks nearby. The California Energy Commission needs to assess the risk in our area for vulnerable populations.

Sincerely, Jim Jones

Inverness Rd.  
Santee CA 92071
