Subject: CEC record - Docket #11 - AFC - 03 Quail Brush Power Generation Siting Case

I am writing about the proposal to rezone the area around Mission Trails Regional Park to an industrial zone. It would be tragic to ruin this Park by doing this. There are many other areas where a powerplant (or whatever is planned in the future) would make more sense. Why put this next to a regional park? There is no way that having a dirty, noisy powerplant would not have a negative impact on the park and the surrounding community. I do not even live in Santee but I often go to the park so this affects a wider area than I think you realize. Also this is a refuge for many animals and plants native to the area. Consider them as well. There aren't many places left for them anymore. Please reconsider this plan.

Thanks for taking the time to read this.
