

Concepts for Project Readiness

- Station developers should be ready and committed to their proposed locations and should document the commitments with their applications
 - Letters of commitment from site owner/station owner about the plans to provide hydrogen fuel at the retail station
 - Clearly document the proposed address(es)
 - Letter from the CEQA Lead Agency
 - Documentation should reflect advanced discussion with the local CEQA Lead Agency
 - For example, does the local CEQA Lead Agency concur that the proposed project would be categorically exempt? Statutorily exempt? Mitigated negative declaration? A project?
 - Regional / local first responder / fire protection experts involvement
 - Consultation , discussion, and outreach
