**Subject:** CEC record - Docket #11 - AFC - 03 Quail Brush Power Generation Siting Case

We don't need another polluting power plant in America! Please, let us reserve the beauty of Southern California instead of tarnishing it with a plant that only encourages the attitude of take-all-leave-nothing from the earth and help us make a sustainable shift to greener forms of energy. For once, don't think of profits or your own self interest, don't even think of the short term benefits like lower cost electricity, but think of the long term effects and think of me and my generation who have to live with the choices that you, the previous generation, has made. For the entirety of our adult life we will have to clean up after you, please don't add another power plant to the already heavy burden you have put on your children. Be part of the change, not part of the problem. Thank you for your time,

Anna Gregor  
Senior at El Capitan High School  
Age 18
