

We the undersigned request the California Energy Commission to require NRG, owner of El Segundo Power, to remove the 15 by 50 foot cement gash/drain that cascades down towards El Porto Beach; the hard surfaced road running west to east; the barbed wire fence that borders 45th Street; and the 6 foot high retaining wall that are all being built in violation of the Conditions of Certification granted by the Commission allowing the plant's construction. We request that you enforce the Visual and other Conditions of El Segundo's permit.

NRG has lied to residents and created ugly and dangerous conditions that need to be corrected for the safety and well being of residents and beach goers. The Energy Commission needs to force NRG to act honorably and keep their word.
