Dear California Department of Conservation,

Please do not devastate the California desert in order to create needed wind and solar energy until we install photovoltaic panels or wind machines on all former farmland that has high salt content or no longer have access to water, brownfields, capped landfills, where aviation prevents high buildings and on every unshaded roof, parking lot, railroad, canal, aqueduct, water bank and reservoir. Do not sell or lease government land cheaply. Electricity made in the desert, far from users, can lose over 5% of its power in transmission.

Thank you for the opportunity to comment,

Arthur Unger
