Subject: Complaint against NRG

Mary,

My name is Richard Nickelson and I live in North Manhattan Beach at 4421 Crest Drive. I was an intervener during the entire process leading up to construction of the power plant. I want you to know that I have absolutely no faith in NRG nor do I believe that they will do anything that was promised in the Conditions of Certification approved by the California Energy Commission. It is apparent by NRG's unwillingness to provide the Berm along 45th Street, as was promised, that they cannot be trusted to do what is right. Also, NRG commented that Ames, their contractor, can do whatever Ames wants, with regard to constructing the Berm, as long as it is legal. They didn't say that they would provided the approved Berm but rather that they would give us whatever they wanted to give us and we could choose the color of the wall they planed to build that wasn't a part of the Berm in the Conditions of Certification. I have a picture of the approved Berm and it doesn't even slightly resemble what NRG is building. We are not asking for something over and above what was approved by the California Energy Commission we just want NRG to do what is right and to provide the Berm and several additional items approved by the California Energy Commission to the North end resident of Manhattan Beach.

In addition, for the last month or two NRG has stopped construction of the Berm and have done nothing to cover the loose dirt that was left in their wake, nor do they water the dirt to control the dust that blows across 45th to our neighbors and also up the hill that sticks to our windows causing us to have window cleaners continually come to our home to take care of the problem caused by NRG. It was another Condition of Certification that this would not be allowed to happen and to be honest I think that NRG is allowing this to show that they are in charge and can do as they please and are therefore doing this to harass those that live in North Manhattan Beach. We would sincerely appreciate whatever you and the Energy Commission can do to hold NRG to the Conditions of Certification approved by the California Energy Commission.

Sincerely,

Richard G. "Nick" Nickelson
