**PURPOSE**

The purpose of the workshop is to allow staff, the applicant, interested agencies, and the public the opportunity to discuss Biological Resources generally, and more specifically the applicant's Data Response to Data Request No. 159, associated with the Rio Mesa SEGF, related to solar power convective heat and radiant flux and associated potential impacts.

[http://www.energy.ca.gov/sitingcases/riomesa/documents/applicant/2012-07-20 Applicants Response to Data Request Set 2A no 159 TN-66280.pdf](http://www.energy.ca.gov/sitingcases/riomesa/documents/applicant/2012-07-20%20Applicants%20Response%20to%20Data%20Request%20Set%202A%20no%20159%20TN-66280.pdf)

The workshop is being conducted jointly because both projects share the same technology, applicant (BrightSource Energy, Inc.), and potential for impacts to birds and bats species. Other topic areas or issues related to staff review of the proposed projects may also be discussed.

**BACKGROUND**Rio Mesa Solar Electric Generating Facility

On October 14, 2011, Rio Mesa Solar Holdings, LLC (subsidiary to BrightSource Energy, Inc.), submitted an Application for Certification (AFC) to construct and operate the Rio Mesa SEGF. On December 14, 2011, the Energy Commission approved the Executive Director's recommendation that the AFC was deemed complete for purposes of commencing the Commission's siting review process. The staff will use the information obtained from the workshop discussions to prepare its Preliminary Staff Assessment for the project.

Hidden Hills Solar Electric Generating System

On August 5, 2011, Hidden Hills Solar Holdings, LLC, (subsidiary to BrightSource Energy, Inc.), submitted an Application for Certification (AFC) to construct and operate the Hidden

Hills Solar Electric Generating System (HHSEGS). On October 5, 2011, the Energy Commission approved the Executive Director's recommendation that the AFC was deemed complete for purposes of commencing the Energy Commission's siting review process. The staff will use the information obtained from the workshop discussions to prepare its Final Staff Assessment for the project.

## **PROJECT DESCRIPTION**

### Rio Mesa Solar Electric Generating Facility

As currently proposed, the Rio Mesa SEGF would comprise two solar fields and associated facilities encompassing a total of approximately 3,805 acres and would be located on the Palo Verde Mesa in Riverside County, California, approximately 13 miles southwest of the City of Blythe. If approved, the two power plants, solar fields, and associated facilities would be located on private land leased from the Metropolitan Water District of Southern California. The project gen-tie line, emergency and construction electrical power supply line, and primary access road would be located on federal land administered by the U.S. Bureau of Land Management (BLM). If approved, each solar plant would generate 250 megawatts (MW), for a total net output of 500 MW and would use heliostats – elevated mirrors guided by a tracking system mounted on pylons – to focus the sun's rays on a receiver steam generator located atop a 750-foot tall solar power tower near the center of each solar field. Each solar plant would utilize approximately 85,000 heliostats.

### Hidden Hills Solar Electric Generating System

As currently proposed, the HHSEGS would comprise two solar fields and associated facilities encompassing a total of approximately 3,277 acres of privately owned land leased in Inyo County, California, immediately adjacent to the Nevada border. The project site is approximately 8 miles southeast of Pahrump, Nevada, and approximately 45 miles northwest of Las Vegas, Nevada. If approved, each solar plant would generate 250 megawatts (MW), for a total net output of 500 MW and would use heliostats – elevated mirrors guided by a tracking system mounted on pylons – to focus the sun's rays on a receiver steam generator located atop a 750-foot tall solar power tower near the center of each solar field. Each solar plant would utilize approximately 85,000 heliostats. The transmission line and natural gas pipeline are both located wholly within the state of Nevada on federal land managed by the U.S. Bureau of Land Management (BLM).

The components for both projects located within federal lands noted above, along with the entirety of the projects, as connected actions, will be reviewed under the National Environmental Policy Act (NEPA), for which the BLM is the lead agency.
