Subject: NRG El Segundo Plant

In regards to the massive construction activity by NRG - which wistfully calls itself econrg on its web-site- this is to object to the clear violations and dangers currently being undertaken by the company.

In brief, and as you are no doubt aware since these are pubic documents, the renderings and commitments made by NRG in order to get approval for the project have not been followed. The most obvious, from someone who travels 45th street regularly and which is, in fact, residential across the street, have totally been ignored. There is no green belt construction, which was promised and was shown in renderings. More alarmingly, NRG has moved its fence from its former set-back, so that it is now curb-side. This removal of public access to the beach is not only a breech of faith with the community, causes a danger by now forcing pedestrians, surfers and families to walk in the street to get to the beech.

There are a number of other non-compliant activities in which NRG casually proceeds and about which others have commented. I wonder how many other violations would emerge on that campus if fully reviewed.

Sincerely

Gregory Cherep
