

Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission's website and be available to the public.

One of my concerns is the visual impact this type of plant will have on the surrounding area. What plans, if any, have been made to assist in reducing the visual imprint? Has any consideration been given to planting trees, vegetation around the site to assist in reducing the plants impact to the area?
