

Public Comment regarding the proposed Quail Brush Generation Project

I would like to make the following written comment. I understand that my comments will be docketed and may be posted on the Energy Commission's website and be available to the public.

a lot of facts & figures & mathematical equations were presented, ^{so} that it appears Quail brush's decimation of the land they intend to use is OK - it is not OK - they are advised of problems, then they come back with solutions, then more problems are identified & they come back with more solutions - its like shaving bits of wood off the end of a beam until it fits.

it seems the state will bend & bend for Copentrix - all, of course, within acceptable regulatory guidelines.

The bottom line here is the location is unacceptable. Copentrix is ~~not~~ not interested in the people who will be affected by the pollution. They care only about the financial bottom line - Conscience is out the window - money is all that matters.

Shame on
Copentrix & Shame on
the CEC if they override
the wishes of the people &
the legislative
