OCT 26 2012

PURPOSE

The purpose of the workshop is to allow staff, the applicant, intervenors, interested agencies, and the public to discuss technical disciplines related to the HECA Amended Application for Certification, including but not limited to: the Occidental Elk Hills planned use of HECA CO₂ for enhanced oil recovery, Greenhouse Gas, Carbon Capture and Storage, and other topics as needed. Staff continues to solicit public questions and comments related to the HECA project.

BACKGROUND

On May 2, 2012, SCS Energy, LLC, submitted an Amended Application for Certification (08-AFC-8A) reflecting several changes to the original project design. The new Amended Application for Certification (AFC) has been assigned a new, distinguishing docket number, 08-AFC-8A.

PROJECT DESCRIPTION

The applicant proposes to construct and operate an integrated gasification combined cycle (IGCC) power generating facility called Hydrogen Energy California (HECA). The proposed

PROOF OF SERVICE (REVISED 10/8/12) FILED WITH
ORIGINAL MAILED FROM SACRAMENTO ON 10/26/12

DLS

HECA power generating facility would gasify blends of 75 percent western coal and 25 percent petroleum coke from California refineries to produce hydrogen to fuel a combustion turbine operating in combined cycle mode. The amended project incorporates a proposed manufacturing complex that would produce urea in both liquid and pellet form for agricultural uses. The combined cycle power block would generate approximately 405 MW of gross power and would provide a nominal 300 MW of electricity to the grid.

The gasification block would also capture approximately 90 percent of the carbon from the raw syngas (the direct end of the gasification process) at steady-state operation, which will be transported via pipeline to a custody transfer point at the Elk Hills Oil Field for carbon dioxide (CO₂) enhanced oil recovery (EOR) and sequestration. The Energy Commission staff has begun its discovery and analysis of HECA and issued data requests A1-A123 on August 10, 2012 and second set of data requests A124-A180 on September 6, 2012. Both of these documents may be found on the project web page using the link provided below. Initial responses to A1-A123 were received on August 22, 2012, with follow-up responses provided in several installments through September and October. Staff will use information obtained from the workshop discussions in the preparation of its preliminary staff assessment of the project.

PARTICIPATION

Please direct your technical or project schedule questions to Robert Worl, Energy Commission Project Manager, at (916) 651-8853, or by e-mail at robert.worl@energy.ca.gov. If you desire information on participating in the Energy Commission's review of the project, please contact the Energy Commission Public Adviser's Office, at (916) 654-4489 or toll free in California, at (800) 822-6228. The Public Adviser's Office can also be contacted via email at publicadviser@energy.ca.gov.

If you have a disability and require assistance to participate, please contact Lou Quiroz at (916) 654-5146 at least five days in advance.

If you wish to provide written comments on the project, please submit comments to the Energy Commission Dockets Unit. Please include the docket number 08-AFC-08A for the HECA project in the subject line or first paragraph of your comments. If you wish to submit comments electronically, please provide them in either Microsoft Word format or as a Portable Document Format (PDF) to docket@energy.ca.gov. Please include your name or organization's name in the file name. If you are preparing non-electronic written comments, please mail or hand deliver them to:
