Subject: Public Workshop at Eader Elementary School in Huntington Beach

Docket 12-AFC-02

Roger E. Johnson
Deputy Director
Transmission and
Environmental Protection Division

Dear Sir,

I live one block from your proposed project. My deep concern is that the project will be even closer to my home, causing much noise 24 hours a day. Our quality of life will be disrupted if you don't have a plan to mitigate the noise through screening, walls, rubber, etc. The fact that you are trying to make this project more environmentally friendly and esthetically pleasing. I wonder why you want to make the project even closer to our homes. You have all of that property to use. Please push it back so we won't be so affected by noise.

Joanne Rasmussen
