Subject: County of Riverside LOS Thresholds
Date: Monday, October 29, 2012 9:59:31 AM

Hello Andrea,

The County of Riverside (County) has a General Plan Circulation Policy (C2.1) which states:

Maintain the following countywide target Levels of Service:

LOS "C" along all County maintained roads and conventional state highways. As an exception, LOS "D" may be allowed in Community Development areas, only at intersections of any combination of Secondary Highways, Major Highways, Arterials, Urban Arterials, Expressways, conventional state highways or freeway ramp intersections.

LOS "E" may be allowed in designated community centers to the extent that it would support transit-oriented development and walkable communities

In the case of the Rio Mesa SEGF project, portions the intersections of Rannells Blvd./28th Ave. and Neighbors Blvd./28th Ave. fall within the jurisdiction of the County. The County, in part, is responsible for the maintenance of these intersections and would attempt to maintain a level of service (LOS) C or better at these locations in accordance with the policy stated above. Also, keep in mind the published Rio Mesa SEGF PSA has also stated this is the threshold applied at these intersections (Pages 4.11-8, 4.11-14, 4.11-15).

Thanks,

Kevin Tsang, P.E.
